

## AMMUNITION INCINERATOR

Ammunition incinerator for disposal of non-detonating ammunition (small arms ammo, pyrotechnics) and ammunition elements in a rotary furnace.

Rotary furnace installed inside ISO-1C container

- Working temperature 400 – 600 °C
- Separate loading and off-loading rooms
- Fuel oil or natural gas burners
- Control panel

Disposal of non-detonating explosive wastes

- Small calibre ammunition
- Pyrotechnics
- Primers, disassembled fuzes
- Desensitized explosives

Off-gas treatment unit

- Afterburner
- Alkaline and acidic scrubbers
- Active carbon filters
- Heavy metal adsorbers
